# Lily's Story

Every now and then, an animal comes along who tugs at our heartstrings just a little harder. Lily came to us in the middle of May after a couple of concerned animal lovers brought her in. They'd found her in a ditch on the side of a highway just a few kilometres from Sainte Rose Du Lac, Manitoba. She was hardly recognisable as a dog - her fur was matted and her face was so dirty you could barely see her eyes.

Lily has demodex, a skin disease caused by mites. She was small and visibly frightened - it took awhile for her to warm up to us. Lily was tentative at first, though she began to trust our clinic staff more and more, and looked forward to her daily baths - a warm, sudsy relief for her itchy skin. Lily got lots of love and care at our clinic. With time, not only did her skin begin to clear and her fur grow back in little fluffy tufts, but her beautiful personality shone through! Lily is now a sweet and friendly girl who loves to cuddle and play.

When it came time for Lily to find a foster home, the perfect family stepped up. This beautiful girl loves her foster family, and she's making lots of new friends - both furry and human - everyday! Your donations help animals like Lily get the support they need. From her clinic treatments to her foster supplies, you help Lily and thousands of other animals per year have happy endings. Lily needs some more time in her foster home, but we just know she'll find the perfect forever home one day!

Together
